
Cat. No:	Catalog N OX-005	Amount 50 µg	Concentration 0,1 µg/µl
-----------------	---------------------	-----------------	----------------------------

Product Description: 100 bp DNA Ladder consists of DNA fragments suitable for use as molecular weight standards for agarose gel electrophoresis. This DNA marker provides accurate band sizes and contains bromophenol blue and xylene cyanol dyes for visualization on agarose gel. 100 bp DNA marker contains 12 DNA fragments ranging from 100 bp to 3000 bp.

Concentration: 0.1 µg/µl

Size Range: 100 – 3000 bp

Number of Bands: 12

Recomendations: In order to obtain best results load 5-10 µl 1 kb DNA Ladder. For illustration refer to the picture located on the next page.

Composition: 10 mM EDTA, 10% Glycerol, 0.015% Bromophenol Blue, 0.015% xylene cyanol.

Storage Conditions: Can be stored up to 9 month at 4°C

Passes quality control requirement:
